# ... Our Journey

## Fullerstop Is Founded: Empowered Innovation, the First step

From humble beginnings with a passionate team of only 3 employees, we embarked on our journey with a vision for growth. Our journey began with a small team, focusing on desktop apps and small websites, setting the stage for future growth and success.

2001-2006

## Transformed Visions into Reality, Together

As a team, we grew to 70+ members, forging valuable partnerships with brands like Johnson & Johnson, Timex & more, becoming a trusted partner for impactful digital solutions.

2007- 2010

## Lead the Digital Transformation & Innovation

We have embraced cutting-edge technologies like AI, ML, blockchain, CI/CD, and Microservices, transforming businesses and industries, making an impact on the technological landscape.

2020-2023

## Empowered Businesses with Big Data Insights

Our dynamic team of 150+ skilled individuals embraced Big Data, empowering businesses with data-driven insights and solutions..

2016-2020

## Unleashed Innovation, Pioneered Mobile Apps

Our team surpassed 120+ members, embracing mobile app development and diversifying their services, ready for bigger challenges.

2011-2015

# CLIENT TESTIMONIALS

## Ismail

Founder, NCO of Retrieval

"Hi there, My name is Ismail, I'm the founder NCO of Retrieval. We're mobile application to help you organize your photos and it's a very complicated problem. We needed the best team to help me solve this problem in order to be able to see our future photos again. We have started working with these guys on a small task at Fullestop and we grow our relationship and now they're handling the project for me and the team. I like the diversity of their portfolio, the guys that they have on board. So, you can actually feel confident enough whenever you're facing any problem, even if it's not in the core of the business that you're doing, you'd always have the resources available just by sending a simple e-mail and adding that to the complete project that you have and not inflicting any additional time spent to actually look for resources. That had actually helped me a lot to focus on the challenge that we want to solve, and we've been doing pretty good job right now. I invite you over to check the guys at Fullestop and work with them. You're never going to be disappointed.

## **Ryan Haylock,**

CEO, Haylock Strategic Solutions Cayman, Islands

Hi, My name is Ryan Haylock and I'm with Haylock Strategic Solutions in the Cayman Islands and I'd like to recommend Fullestop as a website development partner. I say this because you know, in deciding who to choose as your website developer, that can be a little potluck as very few people including myself understood and today still understand exactly what is actually involved. I mean luckily, I found Fullestop. I wanted to initially create only one very basic website.

However, based on the service, the turnaround and the fantastic pricing, I knew that I would continue using Fullestop. Today we're working on my 4th website, and I envisioned more in the pipeline. The development of my websites was the end product of much ongoing mental processes that involved a lot of consultation and much cooperation by the team at Fullestop. They had input at every stage, the result being sites that fit the image and brands that I want to portray the team at Fullestop our top notch and have far exceeded my expectations, so I highly recommend them to anyone seeking to establish or grow their online business.

## **Hamad Alhussaini**

CEO, The Architect Saudi Arabia

I'm Hamad Alhussaini founder of The Architect. I had a dream to have an E service business with a vision and FULLESTOP made that vision reality all the thanks to the team specially Kriti Gupta and Mr. Vijay for his endless support during the project. I would really recommend FULLESTOP services to people I know as they will work with as a partner rather than just a normal service provider.

## **Heba Mustafa,**

**Website administrator, Sharbel Fashion**

Hello, I'm Heba Mustafa. I'm the website administrator of sharbelfashion.com. I have been with Sharbel for one year. I can't say that we and Sharbel are totally specified from the website design. Actually, the website design steps were proceeding smoothly and conceptually. Fullestop Explained and simplified for us every step with a pleasure. Also, the step we're proceeding exactly as the prepared time schedule without any delay even after we received Sharbel website. Fullestop made first to advise us on how to manage the website to be attractive for customers and easy to be administrated. I have to say that Sharbel website added a quart and leap in the nature of our work at Sharbel Company in terms of increasing the number of customers and they say with which they view the products we sell. Our team didn't face any difficulties in dealing with the website and in case there was any question. Support team never hesitated to give us the appropriate solutions with a smile. Here it's necessary to Thanks Mrs. Kriti who was in contact with us all the time to assess the exiling and administrate travel website. In simple words we received from. Easy, fast, attractive and effective website in a short time. Thanks.

## **Mr. Sonam Wangchuk**

**Project Founder Ladakh in Jammu & Kashmir, India | 02 April 2021**

Hello, friends. At FULLESTOP! Greetings from the mountains of Ladakh on a very cold afternoon. We can't tell you how grateful we are to you for your help with the I Live Simply movement, and how you spared so much of your time and energy to make it happen. The software part of it, and all pro bono, we all work for the planet, for our Mother Earth, and I am grateful for playing your part in this. And today, thousands of people are using that to help serve the peace on this planet. I extend my heartiest thanks and hope we can partner in the future. Also, I congratulate you for your role in this kind of support. It's not just about CSR money. It's more about passion and feeling for a cause and engaging in action. So, thank you, everyone, at FULLESTOP, particularly Rahul and Ashutosh and Rishi and Ankita, who spent a lot of time developing this software. But I'm sure there are so many others behind the scene who I may not be able to name. Therefore, I just want to say thanks, to all of you, on behalf of the mountains of Ladakh, the glaciers of Ladakh, and this planet Earth. Juleh.
